COIN ACCESSORIES

CATALOGUE 2020

Dear collectors,

We are very pleased to present this Accessories for Numismatists catalogue, containing our extensive range of accessories for coin enthusiasts. After more than 100 years of experience in collecting accessories, over 6,000 items now bear the LEUCHTTURM trademark, which has become symbolic of maximum utility and quality. Your feedback is very important to us. Please support us with your comments, suggestions and even criticisms, and do not hesitate to contact us at info@leuchtturm.com

Besides numerous proven classics, this catalogue also contains many exciting new products. Take a look at our space-saving QUADNUM Mini coin capsules for particularly small coins with a diameter of 10 to 29 mm (see page 66), our round ULTRA Intercept coin capsules with active protection against tarnishes (see page 78), which complement our range with INTERCEPT® technology, and our handy KAVENT safe, which will protect your collection from wandering hands (see page 116)!

Here's wishing you hours of pleasure with your hobby along with our matching accessories for your collection!

Use the quickfinder to find your way around the catalogue!

The accessories catalogue is subdivided into different categories. One category is "optical accessories", for example. Every category is assigned a colour, for example, "optical accessories" is orange. On the following pages, you will find a coloured section on the right-hand margin which indicates the colour of the respective category. This means you will be able to recognise immediately which category you are looking at. The quickfinder primarily helps you to jump to the desired accessory category, without having to look through every single page of the catalogue. Try it out!

Boxes, cases and presentation cases

In order to be able to safely store your unique collection for many years to come, we recommend LIGHTHOUSE coin drawers, sturdy coin cases, elegant wooden presentation cases and stylish coin etuis. Choose your storage solution from our huge selection. Our coin drawers, for example, provide a tried-and-tested system with over 50 different types of compartment, creating a system that can be expanded, combined and stacked to suit your needs. A coin case is the most secure storage and transport solution for your coins, and will stop them from getting damaged. The high-quality workmanship of LIGHTHOUSE VOLTERRA wooden presentation cases and the wide range of embossing choices for particular types of collections (e.g. one-ounce silver panda coins) or personalised embossing make this the ideal luxury storage solution for your valuable coins, not to mention our wide range of distinguished coin etuis, which will take your breath away. See for yourself on the following pages ...

INTERCEPT®-Box L180 for letters and postcards

The box with active protection against ageing and oxidation

The L180 box actively protects your collection from ageing and oxidation thanks to the INTERCEPT® material inside. Ideal for protecting paper, coins, CDs and medallions. Suitable for postcards, letters, stockcards, documents, coin sets, etc. up to 180 x 160 mm (7 x 6 ¹/₄") in size. Overall size: 338 x 167 x 204 mm (13 ¹/₄ x 6 ⁵/₈ x 8").

The way an INTERCEPT® box works is based on over 30 years of patented INTERCEPT® technology: The copper particles contained in the material permanently bond with corrosive gases and create a neutralised atmosphere in the shortest time possible, protecting documents and coins from ageing or tarnishing (at least 15 years guaranteed protection!). The effect has been proven according to approved DIN, EN, ISO and ASTM standards.

**15 years'
protection
against
ageing***

* You can notice any deterioration in the effectiveness of the material if you see a dark grey to greenish discolouration of the film (not the coins!). If this happens, you should replace the INTERCEPT® product with a new one.

Storage of SLABS (certified coin holders)/EVERSLABS

Many American coin collectors have their coins certified by independent verification services such as the NGC*, PCGS* or ANACS*. In addition to authenticity, the examined coin's standard of preservation is also established. A special feature of this grading process is the subsequent sealing of the coin inside a special square coin capsule (a "slab"). In addition to the examined coin, the "slab" also contains the certification information. The special construction of the "slab" makes it impossible for the capsule to be opened again without it being destroyed. To protect against forgery, the capsule has various additional security features, such as a hologram or a watermark.

* (NGC: Numismatic Guaranty Corporation, PCGS: Professional Coin Grading Service, ANACS: American Numismatic Association Certification Service)

INTERCEPT® box for 50 slabs

The SL 50 INTERCEPT® box actively protects your coins from oxidation thanks to the INTERCEPT® material inside. For 50 slab coin capsules (EVERSLAB, QUICKSLAB, PCGS, NGC, etc.). Suitable for coins and medals made from copper, gold, silver, brass, etc. Overall size: 321 x 97 x 152 mm (12 5/8 x 3 7/8 x 6").

Ref. No. 345 237

€ 22,95

The way an INTERCEPT® box works is based on over 30 years of patented INTERCEPT® technology: The copper particles contained in the material permanently bond with corrosive gases and create a neutralised atmosphere in the shortest time possible, protecting the coins and documents from tarnishing (guaranteed protection for up to 15 years!*). The effect has been proven according to approved DIN, EN, ISO and ASTM standards. In order to prolong the effectiveness of the INTERCEPT® box beyond 15 years, it is recommended that you close the box immediately after use and avoid opening it frequently.

* You can notice any deterioration in the effectiveness of the material if you see a dark grey to greenish discolouration of the film (not the coins!). If this happens, you should replace the INTERCEPT® product with a new one.

INTERCEPT® technology for collectors

... means collecting with active protection against your coins getting tarnished!

Exhaust fumes and moisture result in coins becoming corroded

Danger is in the air ...

Corrosion is a numismatist's worst nightmare. Even if your collection is well cared for and carefully stored, external influences can still damage the raw material of your valuable coins. This is because the air contains several substances which react with metals, leading to corrosion. Nitrous gases are one example, in addition to ozone and other corrosive gases, such as hydrogen sulphides, ammonia, carbonyl sulphide and chlorine compounds.

Problems with traditional methods of protecting coins

There are already several ways for collectors to protect their coins:

As regards regular cleaning, it is important to remember that any contact with the precious surface of the coin will wear it. So, less is more.

This is also true for sealing coins with varnish, wax or oil. The inestimable risks involved in these processes mean they do more harm than good.

The tried-and-tested coin capsule protects from mechanical damage and the acids found on human skin, but it cannot offer permanent protection from corrosive gases.

Technology tried-and-tested in industry

INTERCEPT® technology has been used in IT and heavy industry for more than 30 years and provides reliable protection for highly sensitive platinum, electronic components and car and aeroplane parts during storage and transit, as well as for packaging whole industrial machines. Even museums and archives use this process: the Guggenheim Museum, the US National Archive and the British Royal Mint use it to protect coins, sculptures and other works of art.

Ideal for packaging, transport and storage of easily corroded metals

Patented protection

The process has been proven effective in countless trials and lab tests according to DIN, EN, ISO and ASTM standards. The protection is so effective that even moisture penetration is rid of corrosive elements. The process was even recognised for its eco-friendliness by the German Federal Institute for Occupational Safety and Health. All INTERCEPT® products are non-toxic and completely recyclable.

INTERCEPT® is used in lots of industries, such as aerospace, defence, automotive, electronics, machine engineering, mining and oil and gas extraction.

INTERCEPT® coin capsules actively help to prevent the tarnishing of coins Tarnished coins are a thing of the past!

This industry-approved and tried-and-tested process means you will no longer need to clean or preserve coins using conventional methods. A special foam insert was developed for this purpose for our round and square INTERCEPT® coin capsules.

The insert has been finished in a way to neutralise harmful atmospheric substances inside the capsule, so that your coins are stored in a non-corrosive microclimate.

INTERCEPT® box for approx. 300 coin holders

The Q 100 INTERCEPT® box actively protects your coins from oxidation thanks to the INTERCEPT® material inside. Suitable for approx. 300 coin holders (50 x 50 mm) or for 100 QUADRUM coin capsules. Suitable for coins and medals made from copper, gold, silver, brass, etc. Overall size: 370 x 64 x 125 mm (14 1/2 x 2 1/2 x 5").

Ref. No. 345 235

€ **19,95**

The way an INTERCEPT® box works is based on over 30 years of patented INTERCEPT® technology: The copper particles contained in the material permanently bond with corrosive gases and create a neutralised atmosphere in the shortest time possible, protecting the coins and documents from tarnishing (guaranteed protection for up to 15 years!*). The effect has been proven according to approved DIN, EN, ISO and ASTM standards. In order to prolong the effectiveness of the INTERCEPT® box beyond 15 years, it is recommended that you close the box immediately after use and avoid opening it frequently.

* You can notice any deterioration in the effectiveness of the material if you see a dark grey to greenish discolouration of the film (not the coins!). If this happens, you should replace the INTERCEPT® product with a new one.

LOOK magnifier set 2,5–10X

This set of magnifiers brings together 3 of the most popular magnifiers in an optimal combination, so that you're equipped for any situation:

The **frameless magnifier** with a handle and 3X magnification enables entire viewing of larger objects thanks to the especially large acrylic lens (diameter 90 mm/3 1/2") and 2 white LEDs.

The compact **pocket magnifier** has 5 functions in one gadget: a large lens with 2.5X magnification (lens diameter 30 x 37 mm/ 1 1/4 x 1 1/2"), a small lens with 10X magnification (diameter 15 mm/5/8"), a UV lamp, LED pocket torch and a pull-out ballpoint pen. Due to the compact design, it is ideal for travelling, e.g. when visiting fairs or for shopping.

The **precision magnifier** (lens diameter 21 mm/7/8") provides high-resolution definition for the finest of details, thanks to its 10X magnification and 2 white LEDs.

Did you know?

Magnifiers with 2–3X magnification

These magnifiers are suitable for viewing whole stamps and coins. The image found on the object can be easily viewed with their help and the fine details become visible. These magnifiers can also be used as a reading aid.

Magnifiers with 5–7X magnification

The majority of details can now be identified. Unfortunately, increased magnification of the diameter lens also means reduced reading surface. The distance between the eye and the magnifier as well as between the magnifier and the object is minimised.

Magnifiers with 10–20X magnification

You are now very close the Collectors ultimate piece with this magnification and the smallest details are visible. Individual pixels/flaws can be differentiated for the majority of printing processes. You can't get a finer detail than this.

Microscopes

Intaglio printing becomes more vivid, microprinting can now be viewed more easily and safer, and plate flaws are more easily detectable.

Digital microscopes

Thanks to digital technology, stamps and coins can be viewed on the screen. The software provided allows you to capture images of the objects, save them and edit the image.

Light

A good source of light is vital but not always available. LED technology now gives light to even the smallest of magnifiers so that objects being viewed are well illuminated. You can now purchase LEDs with long-wave UV light for identifying fluorescence.

Folding magnifiers

Pocket folding magnifier 3X

Pocket folding magnifying glass, magnification 3X, and black, genuine leather pouch. The high-quality glass lens (diameter of lens: 40 mm/1 5/8") provides an image without distorting the edges. Highly polished metal lens frame. No sharp edges and exceptionally smooth due to the soft leather. Ideal as a portable magnifier. Overall size (closed): 83 x 57 x 16 mm (3 1/4 x 2 1/4 x 5/8").

Other magnifiers

Ultra bright magnifying glass 10X

Illuminated magnifying glass with LEDs and 10x magnification. The casing and the lens are made of shatter-proof plastic, and the magnifier is both lightweight yet extremely sturdy. The high-quality acrylic lens (diameter: 62 mm/2 1/2") provides an image without distorting the edges. As the magnifier has a concave lens, taller objects can also be viewed under the magnifying glass. The built-in light-emitting diode features 2 brightness levels to reduce eye strain thanks to reduced blue light. The magnifier also has an integrated rechargeable battery, which can be recharged time and again. Contents incl. storage bag, cleaning cloth and USB charging cable. Overall size: 85 x 72 x 45 mm (3 3/8 x 2 7/8 x 1 3/4").

SWING LED magnifier lamp 1.75X

The SWING magnifier lamp is the perfect aid, even when carrying out the most intricate and detailed jobs. It enables the user to keep both hands free for other tasks, has an extra-large glass lens (127 mm/5") with 1.75X magnification (3 dioptries) and provides light as bright as natural daylight thanks to the 60 cold white LEDs. This means, for example, that it is possible to assess the colours of stamps and banknotes without any distortion. Thanks to the flexible, two-part sprung swivel arm, the magnifier head can be moved easily and smoothly into the optimum operating position. The table clamp, which can be continuously adjusted, is suitable for almost any kind of table top (up to a thickness of approx. 63 mm/2 1/2"). Features a cap to cover the lens and a wing screw for fixing the magnifier head. Cable passes through the swivel arm. LEDs cannot be replaced. Only suitable for indoor use. Class A energy efficiency.

Incl. two-piece darkening attachment with magnifying glass 3.5x

Can also be used as an inspection lamp

The LUCY ultraviolet lamp is a top-quality inspection device which provides the user with a host of tried-and-tested features as well as a number of functions. The built-in, durable ultraviolet LED has a very broad wavelength range of 254 nm (shortwave) to 390 nm (longwave), meaning that this device is able to detect and check both fluorescence and phosphorescence. Even pen cancellations on stamps or paper repairs that have been removed can be seen using the LUCY UV lamp. Furthermore, the UV LED used is extremely powerful and provides significantly better results, e.g. phosphorescence afterglow, than other forms of light. The UV lamp can be used both as a portable lamp as well as a table/free standing lamp with magnification. Thanks to a special darkening attachment, the lamp also works perfectly in bright surroundings, such as in artificial light or daylight. The attachment to create a darker environment is made of two parts, whereby one section comes with a magnifying lens (3.5x magnification), in order to be able to detect details more easily. Both attachment parts can be used together or individually. Other benefits of the LUCY UV lamp include the table/free standing casing made of hard plastic with rubberised, anti-slip sides, a push button for switching on and off the UV lamp, meaning the lamp is ideal for travelling, trade fairs and exhibitions. Battery powered (4x 1.5 V AAA batteries, not included). Overall size (excl. attachment): 145 x 85 x 25 mm (5 3/4 x 3 3/8 x 1").

Important note:

Mints of "proof" or "proof-like" quality should not be touched in order to keep their value. The coin polishing cloth is perfect for cleaning "used" circulation coins.

Note:

The coin polishing cloth is ideal for cleaning "used" coins in circulation.

We would like to point out that "proof" or "proof-like" coins should generally not be cleaned in order to preserve their value.

Coin polishing cloth

This very finely woven coin polishing cloth will make your coins shine again. The polishing cloth is impregnated to make heavy dirt and tarnishing disappear with gentle rubbing. Also suitable for cleaning jewellery and cutlery.
