STAMP ACCESSORIES CATALOGUE 2020

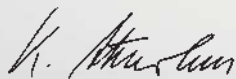

Dear collectors,

Passion and pleasure are two terms that we at LIGHTHOUSE have been pursuing for over 100 years with our high-quality accessories. We are, therefore, pleased to present this Accessories for Philatelists catalogue, containing our extensive range of accessories for stamp enthusiasts.

More than 6,000 products bear the LIGHTHOUSE brand name, which has become a symbol of top quality and practicality. That is why we are always on the lookout for new, original products which will make your hobby even more enjoyable. Your feedback is very important to us. Please support us with your comments, suggestions and even criticisms, and do not hesitate to contact us at kunden@leuchtturm.com

Besides a whole host of classic philatelic items, this catalogue also includes some exciting new ideas such as, for example, the strong and secure KAVENT safe (see page 3), the MONOKOL LED magnifying glasses, leaving both hands free for other things (see page 90), the LUCY UV lamp which comes with attachments for darkening and magnifying purposes (see page 96) as well as the DM5 LCD digital microscope for our price-conscious collectors (see back cover).

We hope you enjoy the fascinating world of stamps!

Walls and door made of strong steel

2 solid steel bolts

KAVENT safe

Protect your valuables against theft or unauthorised access with the LIGHTHOUSE KAVENT safe. The safe's walls are made of 2 mm-thick steel and its door is made of 4 mm steel. The safe is locked by means of a double-bit key and 2 solid steel bolts.

Thanks to the inner dimensions, there is enough room in this safe for storing an A4 office ring binder, 3 GRANDE ring binders incl. slipcase, stockbooks, PERFECT turn-bar binder, LUXUS springback binder, EXCELLENT ring binder and lots more. A soft felt mat on the inside ensures that your valuables do not get scratched etc. There are two openings for screws on both the base and back wall of the safe, meaning that the safe can be affixed to a wall, wardrobe wall, to the ground or to the shelf floor (fittings included). 2 double-bit keys, each with a separate key number that is unique to the integrated lock are included in the package. Weight: 13.5 kg. Size of door opening: 355 x 240 mm (14 x 9 1/2" L x H). Usable interior space*: 425 x 290 x 340 mm (16 3/4 x 11 3/8 x 13 3/8" L x H x T). Overall size: 430 x 295 x 360 mm (17 x 11 5/8 x 14 1/8" L x H x T).

Ref. No. 360 945

€ 129,95

* Please note there is a slight deviation in size where the lock and hinges are located: the inside depth of the safe (door open) is 313 mm (12 1/4") where the hinge is located. The inside depth of the safe (door closed) is 300 mm (11 7/8") where the lock is located.

Use the quickfinder to find your way around the catalogue!

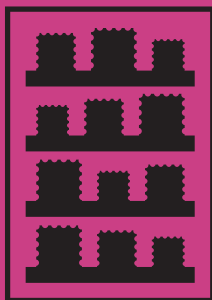

The accessories catalogue is subdivided into different categories. One category is "optical accessories", for example. Every category is assigned a colour, for example, "optical accessories" is orange. On the following pages, you will find a coloured section on the right-hand margin which indicates the colour of the respective category. This means you will be able to recognise immediately which category you are looking at. The quickfinder primarily helps you to jump to the desired accessory category, without having to look through every single page of the catalogue. Try it out!

Stockbooks and stockcards

When we mention stockbooks, we refer to stamp albums with card pages featuring horizontal glassine or film strips, into which the stamps are inserted. Even if part of the collection is stored elsewhere, e.g. in illustrated albums, stockbooks can serve as storage space for duplicates, as a mobile solution e.g. for trading or to accommodate the most valuable pieces in a deposit box and are an essential piece of kit for philatelists.

On the following pages, you will find over 70 different varieties to match every taste and use. Please choose the size of your stockbook, the colour of the card, the number of pages and the material and colour of the binding.

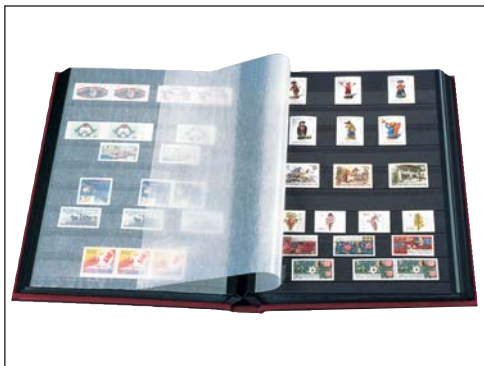

More information about the characteristics and suitability of our sheets is available on our website at www.leuchtturm.com

Brand quality made by LIGHTHOUSE

Please be aware of the subtle differences between our stockbooks when making your selection:

The **embossed gold or silver stripes** give our covers their particularly noble finish.

Double-sided interleave (glassine or clear film) guarantee optimum protection for your stamps.

Tried and tested **double-hinged binding (DLH)** means pages lie flat (doesn't unlock).

High-grammage card. Choose between white, black and chamois-coloured pages.

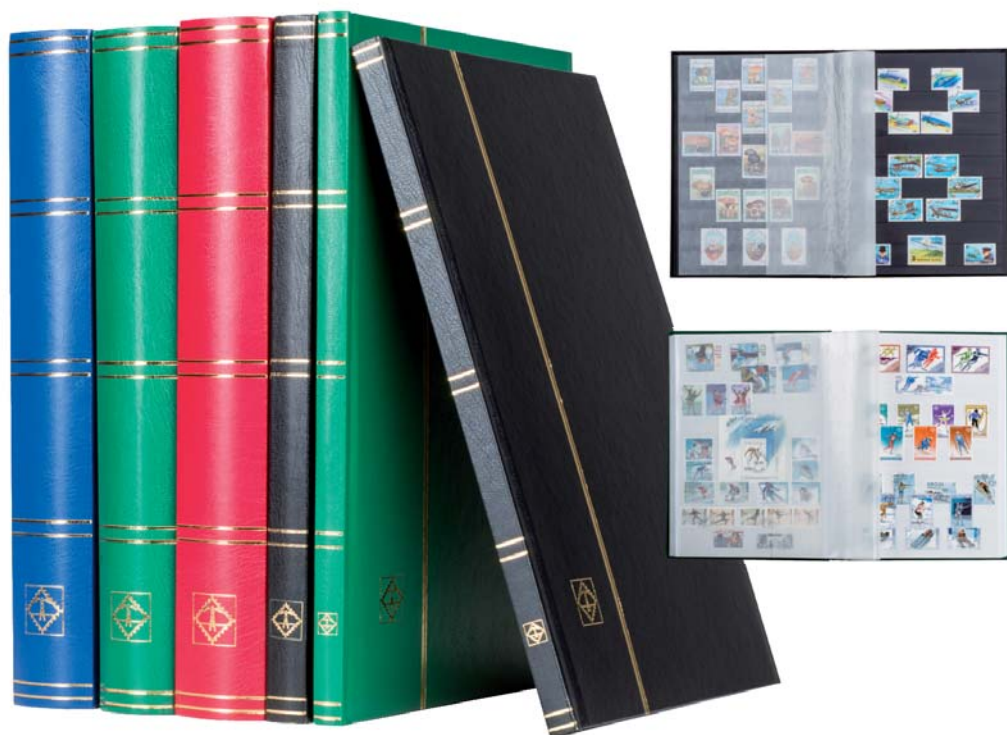

Heavy duty **leather*** with a **leatherette cover** or elegant **genuine-leather cover**. * LEFA = bonded leather material consisting of leather fibres and other sustainable natural raw materials.

Matching **slipcases** are available separately for COMFORT, COMFORT DELUXE, PREMIUM and LEATHER formats (see following pages).

LEFA = **Leather fabrics** (bonded leather) is a bookbinding material consisting of leather fibres and other sustainable, natural raw materials (natural tanning agents, natural latex, natural fats and dyes).

By felting the leather fibres, the LEFA material has almost all the important characteristics of natural leather. No other material comes so close to natural leather in terms of quality and workmanship as LEFA.

The LEFA cover material we use is characterised by optimum physical characteristics (tensile strength, strong seams, durability, tear resistance, etc.).

Only high-quality and carefully selected raw materials are used for LIGHTHOUSE products in order to ensure the desired product characteristics.

INTERCEPT®-Box L180 for letters and postcards

The box with active protection against ageing and oxidation

The L180 box actively protects your collection from ageing and oxidation thanks to the INTERCEPT® material inside. Ideal for protecting paper, coins and medallions. Suitable for postcards, letters, stockcards, documents, coin sets, etc. up to 180 x 160 mm (7 x 6 ¹/₄") in size. Overall size: 338 x 167 x 204 mm (13 ¹/₄ x 6 ⁵/₈ x 8").

The way an INTERCEPT® box works is based on over 30 years of patented INTERCEPT® technology: The copper particles contained in the material permanently bond with corrosive gases and create a neutralised atmosphere in the shortest time possible, protecting documents and coins from ageing or tarnishing (at least 15 years guaranteed protection*). The effect has been proven according to approved DIN, EN, ISO and ASTM standards.

Illustrated albums

Sophisticated philately requires a professional footing and attention to detail. The LIGHTHOUSE-branded illustrated albums are expertly made with great attention to detail, hence the high quality of material and manufacturing is vital.

Furthermore, LIGHTHOUSE provides the stamp collector with an entire range of philatelic accessories to satisfy all their needs. LIGHTHOUSE illustrated albums fulfil the demands of even experienced and expert philatelists with a huge selection of over 120 collection areas and editorial, philatelic compilation by our specialist editors.

To store your collection in style, we offer binders with various mechanisms in a range of designs in the same high quality. Binders featuring extremely high-quality, heavy duty covers with gold embossing have become firm favourites for collectors.

The advantages of LIGHTHOUSE illustrated albums

LIGHTHOUSE prints its album pages (size 270 x 297 mm/ 13-hole system) on non-ageing wood and acid-free card (170 g/m²) in high-resolution black and white offset print. Colour printing is consciously avoided. This allows you to immediately spot the missing stamps in your collection. SF mounts in sizes which match the stamps, made from clear, anti-glare polystyrene film, free from chemical softener are glued to the card of the albums. The mounts hold the stamps securely in place and prevent them from sticking. They also optimally protect your collection from dust and damage.

Many LIGHTHOUSE illustrated album pages are also available without SF protective covers in a “regular” version.

The individual characteristics of similar stamps which vary in e.g. colour, perforation or printing process are noted on the respective album sheets. This only applies to stamps with MICHEL (major) or Stanley Gibbons numbers and includes the year where required.

In this way we always ensure an aesthetically pleasing overall presentation.

Superior black and white print quality – you can immediately spot the missing stamps in your collection.

Optimum protection for your stamps using the appropriate SF mounts (100% polystyrene, free from chemical softeners and stabilisers).

13 punched holes, meaning sheet remains in position in the binder, elongated punched holes to ensure sheets remain flat.

Sheets match 4 different binder types (Springback binder, 13 ring binder, turn-bar binder and bolt binder).

**OUR
COLLECTORS'
TIP**

Supplements:

You can always keep your LIGHTHOUSE albums up to date with the annual supplements. Supplements are published each year for stamps issued in the previous year.

LB-sheets

LB-sheets are card sheets in album format which come with a welded protective pocket. The film for our LB-sheets is made from 100% polystyrene. Leading archives and museums worldwide recommend polyester for the long-term storage of stamps, records and other valuable documents.

The practical LB-system with all its different combinations of strips and pockets was developed after years of research and careful study of collectors' needs. With the LB-pages you can give your collection that special personal look. They are particularly useful for topical collections or adding special items to existing country albums. You can design any combination or grouping you desire. Mint sheets, maxi-cards, FDCs, booklets, singles, block souvenir sheets, even postal stationery.

The blank system is also ideal for storing and displaying new stamps prior to receiving your new supplements.

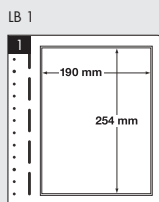

Overall size of the LB page is: 270 x 297 mm
 (10 $\frac{5}{8}$ x 11 $\frac{3}{4}$ ").

1. LIGHTHOUSE pre-cut SF mounts

Did you know?

Magnifiers with 2–3X magnification

These magnifiers are suitable for viewing whole stamps and coins. The image found on the object can be easily viewed with their help and the fine details become visible. These magnifiers can also be used as a reading aid.

Magnifiers with 5–7X magnification

The majority of details can now be identified. Unfortunately, increased magnification of the diameter lens also means reduced reading surface. The distance between the eye and the magnifier as well as between the magnifier and the object is minimised.

Magnifiers with 10–20X magnification

You are now very close the Stamp Collectors ultimate piece with this magnification and the smallest details are visible. Individual pixels can be differentiated for the majority of printing processes. You can't get a finer detail than this.

Microscopes

Intaglio printing becomes more vivid, microprinting can now be viewed more easily and safer, and plate flaws are more easily detectable.

Digital microscopes

Thanks to digital technology, stamps and coins can be viewed on the screen. The software provided allows you to capture images of the objects, save them and edit the image.

Light

A good source of light is vital but not always available. LED technology now gives light to even the smallest of magnifiers so that objects being viewed are well illuminated. You can now purchase LEDs with long-wave UV light for identifying fluorescence.

SWING LED magnifier lamp 1.75X

60 LEDs provide light as bright as natural daylight

Extra-large glass lens with a diameter of 127 mm (5")

The SWING magnifier lamp is the perfect aid, even when carrying out the most intricate and detailed jobs. It enables the user to keep both hands free for other tasks, has an extra-large glass lens (127 mm/5") with 1.75X magnification (3 dioptres) and provides light as bright as natural daylight thanks to the 60 cold white LEDs. This means, for example, that it is possible to assess the colours of stamps and banknotes without any distortion. Thanks to the flexible, two-part sprung swivel arm, the magnifier head can be moved easily and smoothly into the optimum operating position. The table clamp, which can be continuously adjusted, is suitable for almost any kind of table top (up to a thickness of approx. 63 mm/2 1/2"). Features a cap to cover the lens and a wing screw for fixing the magnifier head. Cable passes through the swivel arm. LEDs cannot be replaced. Only suitable for indoor use. For checking fluorescence and phosphorescence ✓

The LUCY ultraviolet lamp is a top-quality inspection device which provides the user with a host of tried-and-tested features as well as a number of functions.

The built-in, durable ultraviolet LED has a very broad wavelength range of 254 nm (shortwave) to 390 nm (longwave), meaning that this device is able to detect and check both fluorescence and phosphorescence. Even pen cancellations on stamps or paper repairs that have been removed can be seen using the LUCY UV lamp. Furthermore, the UV LED used is extremely powerful and provides significantly better results, e.g. phosphorescence afterglow, than other forms of light.

The UV lamp can be used both as a portable lamp as well as a fully lamp with magnification. Thanks to a special darkening attachment, the lamp also works perfectly in bright surroundings, such as in artificial light or daylight. The attachment to create a darker environment is made of two parts, whereby one section comes with a magnifying lens (3.5x magnification), in order to be able to detect details more easily. Both attachment parts can be used together or individually. Other benefits of the LUCY UV lamp include the sturdy casing made of hard plastic with rubberised, anti-slip sides, a push button for switching on and off the UV lamp and is light in weight, meaning the lamp is ideal for travelling, trade fairs and exhibitions. Battery powered (4x 1.5 V AAA batteries, not included). Overall size (excl. attachment): 145 x 85 x 25 mm (5 3/4 x 3 3/8 x 1").
